

# Water Deficit

It's the possibility of **lack or scarcity** of water for consumption

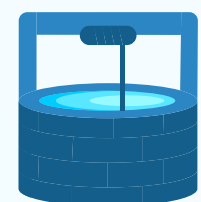

## What's happening?

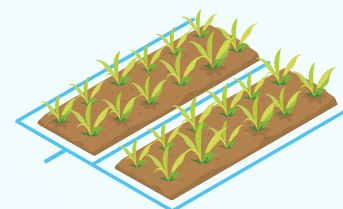

## Contingency measures

Responsible use of drinking water

Use of alternative sources of water (ground water wells).

Strengthening and cleaning of water canals and facilities

## Causes

## Government measures

The Executive Power declared a **State of Emergency** in several provinces

### IT IS IMPORTANT

For the people, farmers and producers at large to start using water rationally and responsibly.
